To Whom It May Concern

Ms. Darlene Persson has helped me to find a fork, part of a set of six forks and knives, a very dear wedding present to me from my parents. The fork was lost for months. I looked "everywhere" and finally concluded that it had gone away accidentally with the trash.

I called Darlene. She "saw" it under the foot of a piece of furniture. I think she mentioned a metal foot. With this information, I started looking again, and to my great surprise found it under a low sofa, that has metal discs as feet. It was next to the coffee table, and I had dropped the fork, while having my breakfast there. Needless to say, I do not move that sofa very often. I wonder how long the fork would have stayed there!

I want to mention that I like the way Darlene deals with her clients: with utmost honesty and sense of humor and empathy.
