

Darlene ~~was~~ was able to help me find a gold watch I had lost one day about 1982. I was living in San Jose and while talking to her from her home in Palo Alto, she suggested I look in some green grass. I was able to locate my watch in the deep grass near my apartment complex swimming pool.

More recently, about 1998, I was unable to find my television remote control. I was living at a Palo Alto address and Darlene had moved to Campbell. The only clue she was able to give me over the phone was "that the remote was up against a ^{knotty pine} ~~knotty pine~~ wood." After searching deep down the sides of my wooden framed waterbed and ^{reaching} ~~feeling~~ under the mattress I was able to locate it. That was the only time in 10 yrs. that the remote worked it's way into that location.
